## Profile

I am a front-end and mobile developer with a solid background that began in 2005. I am skilled in React and Angular, as well as their respective ecosystems, and have built complex products through collaboration with peers using Agile methodologies.

As a design enthusiast with a degree in User Experience, I code beautiful and functional products. This allows me to provide valuable technical feedback to design teams.

Committed to clean code, I stay current with tech trends and aim for accessible experiences. I'm collaborative, continuously learning, and maintain positive interactions.

## Education

[React Native Certificate - Meta \(Facebook\) & Coursera - 2023](#)

[Front-End Developer Certificate \(React\) - Meta \(Facebook\) & Coursera - 2023](#)

[UX Design Diploma](#) - Australian Pacific College - Sydney, Australia / 2013 - 2015

[Web Design College Diploma](#) - UNIP - São Paulo, Brasil / 2003 - 2006

| • HTML, CSS/SASS, Tailwind  | • Micro Frontends       | • Storybook, Figma      |

## Work experience

**CI&T @ Domino's Pizza** - Sep/2023 - present (Brazil/USA)

↳ [Front-end Developer \(React\)](#)

**Technologies:** React, Redux, Redux-Observable, SASS, Jest/Testing Library, GraphQL

As a consultant, I'm an integral member of the front-end development team for one of the world's most renowned pizza franchise chains, Domino's Pizza, headquartered in the U.S.A.

We are tasked with engineering an innovative system upgrade deployed across thousands of global stores. This platform empowers store managers and franchise owners to customize their operations extensively, from pricing and business hours to the selection of pizza offerings.

Additionally, the system includes a sophisticated pizza assembly line interface that assists kitchen staff in the pizza preparation process. It features visual SLA indicators for each order, enabling the team to swiftly identify and prioritize orders at risk of delay, ensuring efficiency and customer satisfaction.

**Act Digital @ Bradesco Seguros** - Aug/2022 - Sep/2023 (São Paulo, Brazil)

↳ [Front-end Developer \(Angular\)](#)

**Technologies:** Angular, TypeScript, NgRx, RxJs, SASS, Karma/Jasmine

As a consultant, I was positioned within the insurance division of one of Brazil's leading banking institutions.

As a dedicated front-end developer, I was responsible for implementing designs from the product team across all offered products using Angular. I maintained a strong focus on unit and integration testing with the Jasmine and Karma libraries.

My responsibilities also included mentoring a junior developer, guiding him with detailed code reviews and feedback. Additionally, I offered recommendations to enhance design feasibility and suggested updates for APIs when legacy code and behaviors necessitated changes.

**Luiza Labs / Magazine Luiza** - Sep/2020 - Aug/2022 (São Paulo, Brazil)

↳ **Mobile Developer (React Native)**

**Technologies:** React Native, TypeScript, Context API, Jest/Testing Library, Rest API

As the sole React Native developer for Brazil's largest retail conglomerate, I led the creation of a hybrid asset management app. My role involved close collaboration with backend developers and the product team, utilizing technologies like React Native, Typescript, and Jest, along with CI/CD tools.

I was responsible for code optimization, expanding unit tests, ensuring cross-device compatibility, and managing releases on Google Play and the Apple Store, significantly enhancing application performance and reliability.

**Betta Tecnologia @ EVI Technology** - Nov/2018 - Sep/2020 (São Paulo, Brazil)

↳ **Front-end Developer (React)**

**Technologies:** React.JS, Redux, Tailwind, Chart.JS, Leaflet Maps

As a consultant at a freight logistics firm, I helped develop an end-to-end logistics solution. As a front-end developer, I worked with peers, back-end developers, data scientists, and designers on the back office platform.

I integrated a dynamic map with Leaflet to show live truck locations with auto-updates. I also created complex charts with cross-referenced data and filters for detailed comparisons using Chart.js.

**Unitransact Pty Ltd** - Aug/2013 - Nov/2018 (Sydney, Australia)

↳ **Web Designer**

**Technologies:** HTML, CSS, Javascript, WordPress, Photoshop, Illustrator, Axure

As the sole web designer for the Australian fintech startup, I played a crucial role in enhancing user experience by creating and implementing new features for the company's main platform. My responsibilities also extended to investigating issues and communicating with customers to identify and resolve bugs.

Additionally, I managed the company's website and developed promotional materials, including newsletters, promotional websites, infographics, and social media graphics.
